Oath/Declaration

I does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The statements "material to examination" and "37 CFR 1.56(a)" are insufficient.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be a non-obvious improvement in the art of turbine vane cooling. Specifically, the use of impingement channels, extending from the convergent flow channel toward the leading edge and terminating in a leading edge cavity aft of an inner surface of the leading edge, having a length that varies such that a first channel located closest to the first end of the generally elongated hollow airfoil being shorted that s second channel closest to the second end of generally elongated hollow airfoil is not known in the art nor would it be obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent issued to Sreekanth et al. discloses a turbine vane including a three-pass serpentine cooling path aft of the leading edge. The patent issued to Rieck, Jr. et al. discloses a turbine vane including a convergent inlet flow channel supplying impingement cooling air adjacent the leading edge.
